The Biology of Forest Growth experiment: an introduction 1
Benson, M.L., Myers, B.J. and Raison, R.J. (Canberra, ACT, Australia)
Dynamics of stem growth of *Pinus radiata* as affected by water and nitrogen supply 117
Benson, M.L., *see* Raison, R.J. et al.
see Snowdon, P. and Benson, M.L.
Borough, C.J., *see* Benson, M.L. et al.
Connell, M.J., *see* Khanna, P.K. et al.
see Raison, R.J. et al.
Crane, W.J.B. and Banks, J.C.G. (Canberra, ACT, Australia)
Accumulation and retranslocation of foliar nitrogen in fertilised and irrigated *Pinus radiata* 201
Cremer, K.W. (Canberra, ACT, Australia)
Relations between reproductive growth and vegetative growth of *Pinus radiata* 179
Falkiner, R.A., *see* Khanna, P.K. et al.
see Raison, R.J. et al.
Khanna, P.K., Raison, R.J., Falkiner, R.A., Willett, I.R. and Connell, M.J. (Canberra, ACT, Australia)
Effects on N P K fertilisation on the chemistry of a yellow podzolic soil under *Pinus radiata* 65
Khanna, P.K., *see* Raison, R.J. et al.
Landsberg, J.J., *see* Benson, M.L. et al.
see McMurtrie, R.E. and Landsberg, J.J.
Lang, A.R.G., *see* Raison, R.J. et al.
Leuning, R., *see* McMurtrie, R.E. et al.
McMurtrie, R.E. and Landsberg, J.J. (Canberra, ACT, Australia)
Using a simulation model to evaluate the effects of water and nutrients on the growth and carbon partitioning of *Pinus radiata* 243
McMurtrie, R.E., Leuning, R., Thompson, W.A. and Wheeler, A.M. (Canberra, ACT, Australia)
A model of canopy photosynthesis and water use incorporating a mechanistic formulation of leaf CO_2 exchange 261
McMurtrie, R., *see* Raison, R.J. et al.
Myers, B.J. and Talsma, T. (Canberra, ACT, Australia)
Site water balance and tree water status in irrigated and fertilised stands of *Pinus radiata* 17
Myers, B.J., *see* Benson, M.L. et al.
see Raison, R.J. and Myers, B.J.
see Raison, R.J. et al.
Raison, R.J., Connell, M.J., Khanna, P.K. and Falkiner, R.A. (Canberra, ACT, Australia)
Effects of irrigation and nitrogen fertilisation on fluxes of soil mineral nitrogen in a stand of *Pinus radiata* 43

Raison, R.J., Myers, B.J. and Benson, M.L. (Canberra, ACT, Australia)
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: I. Needle production and properties 139
Raison, R.J., Khanna, P.K., Benson, M.L., Myers, B.J., Lang, A.R.G. (Canberra, ACT, Australia) and McMurtrie, R.E. (Kensington, NSW, Australia)
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: II. Needle loss and temporal changes in total foliage mass 159
Raison, R.J. and Myers, B.J. (Canberra, ACT, Australia)
The Biology of Forest Growth experiment: linking water and nitrogen availability to the growth of *Pinus radiata* 279
Raison, R.J., *see* Benson, M.L. et al.
see Khanna, P.K. et al.
Snowdon, P. and Benson, M.L. (Canberra, ACT, Australia)
Effects of combinations of irrigation and fertilisation on the growth and above-ground biomass production of *Pinus radiata* 87
Talsma, T., *see* Myers, B.J. and Talsma, T.
Thompson, W.A. (Vancouver, BC, Canada) and Wheeler, A.M. (Canberra, ACT, Australia)
Photosynthesis by mature needles of field-grown *Pinus radiata* 225
Thompson, W.A., *see* McMurtrie, R.E. et al.
Wheeler, A.M., *see* McMurtrie, R.E. et al.

Willett, I.R., *see* Khanna, P.K. et al.

Forest Ecology and Management, 52 (1992) 315–317
Elsevier Science Publishers B.V., Amsterdam

Subject Index

Biomass
Effects of combinations of irrigation and fertilisation on the growth and above-ground biomass production of *Pinus radiata* 87
Carbon balance
Using a simulation model to evaluate the effects of water and nutrients on the growth and carbon partitioning of *Pinus radiata* 243
Carbon uptake
A model of canopy photosynthesis and water use incorporating a mechanistic formulation of leaf CO_2 exchange 261
Cones
Relations between reproductive growth and vegetative growth of *Pinus radiata* 179
Fertilisation
Accumulation and retranslocation of foliar nitrogen in fertilised and irrigated *Pinus radiata* 201
Effects of combinations of irrigation and fertilisation on the growth and above-ground biomass production of *Pinus radiata* 87
Effects of irrigation and nitrogen fertilisation on fluxes of soil mineral nitrogen in a stand of *Pinus radiata* 43
Effects of N P K fertilisation on the chemistry of a yellow podzolic soil under *Pinus radiata* 65
Site water balance and tree water status in irrigated and fertilised stands of *Pinus radiata* 17
Foliage
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: I. Needle production and properties 139
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: II. Needle loss and temporal changes in total foliage mass 159
Growth
Effects of combinations of irrigation and fertilisation on the growth and above-ground biomass production of *Pinus radiata* 87
Relations between reproductive growth and vegetative growth of *Pinus radiata* 179
The Biology of Forest Growth experiment: an introduction 1
The Biology of Forest Growth experiment: linking water and nitrogen availability to the growth of *Pinus radiata* 279
Irrigation
Accumulation and retranslocation of foliar nitrogen in fertilised and irrigated *Pinus radiata* 201
Effects of combinations of irrigation and fertilisation on the growth and above-ground biomass production of *Pinus radiata* 87
Effects of irrigation and nitrogen fertilisation on fluxes of soil mineral nitrogen in a stand of *Pinus radiata* 43
Site water balance and tree water status in irrigated and fertilised stands of *Pinus radiata* 17

Needle fall
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: II. Needle loss and temporal changes in total foliage mass 159
Needle production
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: I. Needle production and properties 139
Needles
Photosynthesis by mature needles of field-grown *Pinus radiata* 225
Nitrogen
Accumulation and retranslocation of foliar nitrogen in fertilised and irrigated *Pinus radiata* 201
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: I. Needle production and properties 139
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: II. Needle loss and temporal changes in total foliage mass 159
Dynamics of stem growth of *Pinus radiata* as affected by water and nitrogen supply 117
Effects of irrigation and nitrogen fertilisation on fluxes of soil mineral nitrogen in a stand of *Pinus radiata* 43
Effects of N P K fertilisation on the chemistry of a yellow podzolic soil under *Pinus radiata* 65
The Biology of Forest Growth experiment: linking water and nitrogen availability to the growth of *Pinus radiata* 279
Nutrients
The Biology of Forest Growth experiment: an introduction 1
Using a simulation model to evaluate the effects of water and nutrients on the growth and carbon partitioning of *Pinus radiata* 243
Phosphorus
Effects of N P K fertilisation on the chemistry of a yellow podzolic soil under *Pinus radiata* 65
Photosynthesis
A model of canopy photosynthesis and water use incorporating a mechanistic formulation of leaf CO_2 exchange 261
Photosynthesis by mature needles of field-grown *Pinus radiata* 225
Potassium
Effects of N P K fertilisation on the chemistry of a yellow podzolic soil under *Pinus radiata* 65
Reproductive growth
Relations between reproductive growth and vegetative growth of *Pinus radiata* 179
Retranslocation
Accumulation and retranslocation of foliar nitrogen in fertilised and irrigated *Pinus radiata* 201
Simulation model
Using a simulation model to evaluate the effects of water and nutrients on the growth and carbon partitioning of *Pinus radiata* 243
Soil
Effects of irrigation and nitrogen fertilisation on fluxes of soil mineral nitrogen in a stand of *Pinus radiata* 43
Effects of N P K fertilisation on the chemistry of a yellow podzolic soil under *Pinus radiata* 65
Stem growth
Dynamics of stem growth of *Pinus radiata* as affected by water and nitrogen supply 117

Vegetative growth
Relations between reproductive growth and vegetative growth of *Pinus radiata* 179
Water
A model of canopy photosynthesis and water use incorporating a mechanistic formulation of leaf CO_2 exchange 261
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: I. Needle production and properties 139
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: II. Needle loss and temporal changes in total foliage mass 159
Dynamics of stem growth of *Pinus radiata* as affected by water and nitrogen supply 117
Site water balance and tree water status in irrigated and fertilised stands of *Pinus radiata* 17
The Biology of Forest Growth experiment: an introduction 1
The Biology of Forest Growth experiment: linking water and nitrogen availability to the growth of *Pinus radiata* 279
Using a simulation model to evaluate the effects of water and nutrients on the growth and carbon partitioning of *Pinus radiata* 243
